AUDAC Touch™ 2 – Release notes
Version 2.2.2

Improvements:

- UX improvements of the AMP203 firmware update tool.
- Scene selection and global scene selection boxes will now fill the full size of the widget.
- When using the 'text label widget', the width of text input filed is now larger.
- A notification will now appear when a new version of the application is available.

Bugfixes:

- XMP44 will now always asks for a password.
- When editing a widget, the title screen now displays correctly.
- The scene widget now reacts correctly when affected by other widgets on the dashboard.
- NMP40 volume slider widget now scales accordingly.

We would like to thank everyone for all the feedback. Together we are building the future.

Supported platforms include: Linux, iOS, Android and Windows
