

CENA and CIRA series

Clear sound hidden in plain sight

The **CENA series** is designed to offer a cost-effective solution in a single cone 4.5" and 6.5" model and have a low-profile construction that allows placement in locations with limited ceiling space thanks to our patented SpringFit™ mounting system.

The **CIRA series** is designed with installer convenience in mind and delivers superior audio reproduction. This series has a lot of the advantages that are normally only found in premium priced ceiling speakers. The CIRA series is granted with a well-balanced two-way speaker combination that fills an entire room. TwistFix™, a patented lock system, allows easy removal and replacement of the grill.

To fully inform you, we have assembled a convenient product overview showing the successors of our current ceiling speaker series.
