

Atellio family: LUNA Series

Firmware and AUDAC Touch™ update

We would like to bring you another update about the Atellio family. Please make sure you are always running the latest version of AUDAC Touch™. You can find the latest versions here: <https://audac.eu/eu/software/audac-touch>

Released on 11/12/2024

LUNA Series 1.5.0: New features

- Snapshots
- Exclude periods for an event
- Events triggered by contacts can be used without time server
- LUNA can be configured with a local time server
- Extra commands available in events (Output gain, Apply snapshot, AGC/Noise gate, Paging volume)
- Extra ASCII commands (Volume all, Mute all, Route all, Apply Snapshot, Bluetooth Pairing)

Please note: After a LUNA filesystem update all licenses will be resynchronized. The licenses are recovered automatically from the AUDAC license server but all licensed features and channels must be re-enabled manually on the device

Known limitations for the latest version

Luna series – V1.5.0

- For licenses, the LUNA series require an internet connection. Offline activation via USB will be implemented later.
- After changing the device address, 1 event needs to be updated and saved to sync the device address in the event handler

Released on 21/08/2024

Luna 1.4.0: New features

- Pin code configuration on LUNA for display lock (default 0000).
- Limiter on LUNA outputs
- Noise gate improvements on LUNA inputs
- Event handler on LUNA can be used without time server for contact triggers
- ASCII command support on RS232 and RS485 on LUNA

Luna 1.4.0: Bug fixes

- VoiceFile repeat function
- GPIO improvements

Released on 17/05/2024 (USB only update)

Luna 1.3.0: New features

- exFAT support for USB drives.
- Added automatic GPIO output triggering with VoiceFile
- Added automatic GPIO output triggering while paging
- Added Luna MAC address info to front display
- Added Dante network info to front display
- Added Filesystem and Recovery version to front display

Luna 1.3.0: Bug fixes

- Improved AGC.
- Pre gain not working when AGC was enabled.
- Partial settings lost after reboot.
- Luna unexpectedly boots in "Recovery mode".
- Luna not booting and indicating "Running".
- Stability improvements.
- Not discovered by Audac Touch when on DHCP.

- “SD Card flash failed” message when flashing via USB.
- Improved USB drive mounting.
- Update screen shows "Update available" even if the latest update is already installed.
- Changing IP settings required a device reboot.
- Dante™ names not in sync.
- Voicefile play completely function not always working on folders.

Release on December 6th 2023

- Luna firmware version: 1.2.2

New features

- Firmware updates of LUNA via AUDAC Touch™ on the same network. One last Luna firmware update (to 1.2.2) is needed via the front panel.
- Luna GPO triggering via Luna event handler and NCP105
- Event handler settings backup and restore via file browser
- VoiceFile support for messages on internal SDCard
- Luna bug fixes
 - No audio when mapping a mono sum input to an output
 - Mute status incorrect after repower
 - Linking output audio functions
 - Improved settings handling
 - Multiple small fixes and improvements

Release on October 31st 2023

- Luna firmware version: 1.2.1

New features

- Simple commands interface (routing/volume up-down) on the LUNA & the NWP series.
- Internal Event Handler on Luna.
- Luna bug fixes
 - Volume change ticks
 - In some situations no audio on output 1
 - Zone 1 test signal issue
 - MAC address shown incorrectly
- Luna device and VoiceFile settings backup and restore via file browser
Backup and restore of settings for Event handler will be available in November
- Dashboard widget for mixer slider

Release: September 29st 2023

- Luna firmware version: 1.2.0

New features

- Simple commands interface (routing/volume up-down) on the LUNA

Release: September 21st 2023

- Luna firmware version: 1.1.1

New features

- Voice file player available in Luna device settings

Release: September 13th 2023

- Luna firmware version: 1.0.1

New features

- Voice file player on the LUNA series (via USB).
- VU indication for all the Atellio family products.
- Ability to release licences back from a device.
- An error is shown when trying to enable a not licenced Dante channel in Touch. Dante channel names are not changed after activation but already have a default usable name.

Release: August 31st 2023.

- Luna firmware version: 1.0.1

New features

- Internal Event Handler on Luna
- LUNA configuration support in AUDAC Touch™.
- LUNA dashboard widgets support in AUDAC Touch™.
- Mono/stereo general settings & visualization.
- Zone Scenes on the LUNA series.
- Anti-feedback functionalities on the LUNA series.
- Automatic Gain Control (AGC) on the LUNA series
- Compressor limiter functionalities on LUNA series.
- In- & output delay on LUNA series.
- Priority functionalities on the LUNA series.
- Talk Over functionality on the LUNA series.
- Full Wavedynamics™ integration on LUNA Series.
- GPIO functionalities on LUNA Series.
- Device connection indication on settings screens in Touch.
- IP address configuration without Touch restart.
- Combined slider dashboard widget.
- Connection status of the Atellio family products.
- SL-NAC8 support (Optional 8x8 networked Dante™ expansion license). The MAC address of the device can be read in AUDAC Touch™ (Device/Settings).
- ANM88 Dante™/AES67 networked module 8x8 for LUNA-U available.
