Atellio family
Feature release timeline

We would like to bring you another update about the Atellio features that we are currently working on.

Released on March 12th

Audac Touch – V2.11.5

- VU on zone mixer shows both AFL and PFL level.
- VU for monomix inputs on zone mixer (in device settings).
- VU on dashboard volume sliders for inputs and zones.
- Fix for issue: Audac Touch™ restart needed when a device went into sleep mode on Android or iOS.

NPM200 – V1.1.0

- Voice File Player and voice file triggering on NPM200
- NPM200 Mic/VoiceFile audio on any Dante™ device.
- Standby screen removed.
- Firmware updates of NPM200 via AUDAC Touch™ on the same network.

  (Internet access required)

Expected end of March 2024

Luna 1.3.x: New features

- exFAT support for USB drives.
- Added automatic GPIO output triggering with VoiceFile
- Added automatic GPIO output triggering while paging

Luna 1.3.x: Bug fixes

- Improved AGC.
- Partial settings lost after reboot.
- Luna unexpectedly boots in "Recovery mode".

- Stability improvements.

- Not discovered by Audac Touch when on DHCP.

- "SD Card flash failed" message when flashing via USB.

- Improved USB drive mounting.

- Update screen shows "Update available" even if the latest update is already installed.

- Changing IP settings required a device reboot.

- Dante™ names not in sync.

Expected April 2024

New features

- Automatic discovery of the NPM200 in AUDAC Touch™.

- NPM200 TouchLink Priority based paging support with TouchLink™ zone selection.

- Admin password protection for Atellio series (device settings).

- Snapshots on LUNA.

Expected May 2024.

- Internal Event Handler on NPM200.

- AEC (Acoustic Echo Cancellation) on LUNA-F.

- Dashboard widgets can trigger multiple commands.

Priority list

- Extended Atellio commands interface.
- Message recording with the microphone on NPM200.
- Control widget support on NPM200.
- NPM200 support for Consenso family devices.
- NPM200 commander support.
- NCP105 support for Consenso family devices.
- Rotary led status for corner button actions of NCP105.
- LUA Scripting on LUNA.
- Multi-channel automixer.
- Extensive widget creation (AUDAC Touch™ Pro).
- Offline activation of the product licenses via USB.

Disclaimer

The Atellio products, including LUNA, are currently in a BETA phase until the end of Q1 2024. The use of beta products entails some risks, as potential bugs may still be discovered in practical usage. This timeline is non-binding, and no rights can be derived from it. Please review this document carefully and assess whether the outlined functionalities are necessary for your project's completion.

If there is missing functionality for the project's requirements, our advice is not to install it. Firmware updates cannot be expedited or forced due to time constraints.

Known limitations for the latest version

Audac Touch – V2.11.5

- No VU indication on dashboard widgets for zone mixer.
- Voicefile names are not shown in event handler and dashboard widgets

Luna series – V1.2.3

- 1 extra future firmware update via USB needed for activating OTA operating system updates.
- For licenses, the LUNA series require an internet connection. Offline activation via USB will be implemented later.
- Changing IP settings requires a device reboot.
- Events with GPO must be reconfigured after updating to 1.2.3.
- End date of Events must be set to max 31/12/2037.
- Device could go to Recovery mode after OTA update, a reboot is needed in that case.
- Unexpected AGC behaviour

NCP105 series - V1.0.4

- Will initially only work with the LUNA & the NWP series.
- The devices to control should have a static IP address.

NPM200 series - V1.1.0

- NPM200 must be added manually in AUDAC Touch™.
- Paged Luna devices must have a fixed IP address.
- NPM priority setting must be the same for Mic paging and VoiceFile paging.

Released on January 24th

- Luna firmware version: 1.2.3

New features

- Improved Zone Compressor
- Mixed mono sources added as Talkover source
- Audac branding for the file browser
- Luna bug fixes

- ✓ Luna stability improvement

- ✓ Distortion on output 2 with specific settings

- ✓ Rotary button not working after USB update

- ✓ Triggering GPO from priority not working

- ✓ Event handler trigger delay of 2-3 seconds

- ✓ Event handler not triggering

Released on December 6th

- Luna firmware version: 1.2.2

- NCP firmware version: 1.0.4

- Audac Touch version: 2.11.4

- Touch version: 2.11.4 Download it here: https://audac.eu/eu/software/audac-touch

New features

- Firmware updates of LUNA via AUDAC Touch™ on the same network. One last Luna firmware update (to 1.2.2) is needed via the front panel.

- Luna GPO triggering via Luna event handler and NCP105

- Event handler settings backup and restore via file browser

- VoiceFile support for messages on internal SDCard

- NCP105 supports custom (single) commands via commander function in AUDAC Touch™ for, Atellio family*, Consenso family* & third-party equipment. No visual feedback yet for custom commands via the Commander function.

- Luna bug fixes

  - ✓ No audio when mapping a mono sum input to an output

  - ✓ Mute status incorrect after repower

  - ✓ Linking output audio functions

  - ✓ Improved settings handling

  - ✓ Multiple small fixes and improvements

Released on October 31st

- Luna firmware version: 1.2.1

- NWP firmware version: 1.0.2

- NCP firmware version: 1.0.2

- Audac Touch version: 2.11.3

- Touch version: 2.11.3 Download it here:
  https://audac.eu/eu/software/audac-touch

New features

- Simple commands interface (routing/volume up-down) on the LUNA & the NWP series.

- Enable/disable button functions on NWP series Mic/line.

- Internal Event Handler on Luna.

- Firmware updates of NCP105 and NWP Series via AUDAC Touch™ on the same network.

- Luna bug fixes

  - ✓ Volume change ticks

  - ✓ In some situations no audio on output 1

  - ✓ Zone 1 test signal issue

  - ✓ MAC address shown incorrectly

- NCP105 button auto-calibration

- NCP105 bug fixes

  - ✓ Improved stability for simultaneous use of buttons

- Luna device and VoiceFile settings backup and restore via file browser

  Backup and restore of settings for Event handler will be available in November

- Dashboard widget for mixer slider

Released on September 29st

- Luna firmware version: 1.2.0

New features

- Simple commands interface (routing/volume up-down) on the LUNA

Released on September 21st

New features

- Voice file player available in Luna device settings
- Dashboard widget to trigger voice file
- Improved UI to add dashboard widgets

Released on September 13th

New features

- Increased NCP105 rotary volume control steps from 1dB to 3dB. No NCP firmware update needed, only reprogramming rotary via Audac Touch.
- Voice file player on the LUNA series (via USB).
- VU indication for all the Atellio family products.
- Ability to release licences back from a device.
- Paging volume offset on NPM200.
- An error is shown when trying to enable a not licenced Dante channel in Touch. Dante channel names are not changed after activation but already have a default usable name.

Released on 31st of August

New features

- LUNA, NCP105 & NPM200 & NWP configuration support in AUDAC Touch™.
- NWP series dashboard widgets support in AUDAC Touch™.
- LUNA dashboard widgets support in AUDAC Touch™.
- Paging widget support on NPM200.
- Mono/stereo general settings & visualization.
- Zone Scenes on the LUNA series.
- Anti-feedback functionalities on the LUNA series.
- Automatic Gain Control (AGC) on the LUNA series & the NWP series.
- Compressor limiter functionalities on LUNA series.
- In- & output delay on LUNA series.
- Priority functionalities on the LUNA series.

- Talk Over functionality on the LUNA series.

- Full Wavedynamics™ integration on LUNA Series.

- GPIO functionalities on LUNA Series.

- NCP105 rotary configuration with combined volume and mute (Configure rotary button to volume).

- Device connection indication on settings screens in Touch.

- IP address configuration without Touch restart.

- Combined slider dashboard widget.

- Connection status of the Atellio family products.

- SL-NAC8 support (Optional 8x8 networked Dante™ expansion license). The MAC address of the device can be read in AUDAC Touch™ (Device/Settings).

- ANM88 Dante™/AES67 networked module 8x8 for LUNA-U available.
